

NiUU one

EXCLUSIVE DESIGN | FAST DELIVERY | LOW-COST

NiUU[®] one

The new WC cubicle system NIUU one is the smooth-surfaced system for which two different options are available:

- NiUU one made of melamine resin coated chipboard or
- NiUU one made of direct melamine faced chipboard

Both options are defined by absolute smooth surfaced design. Thereby evolves a high-class appearance and timeless design. The construction details are designed for stability and years of maintenance-free functioning. Especially developed for wash-room areas, the 3-roller edge hinges have sixfold screw fixing. The supporting legs are made of aluminium with stainless steel core and are steplessly height-adjustable. Next to classic fittings with WC lock there are also KEMMLIT grip bars available as an option.

NiUU one is extremely flexible regarding design: ranging from a standard construction with supporting legs and head rail situated in the front, to a floor-to-ceiling solution. This design option allows for doors to be constructed in one piece up to 2800 mm.
